

Want to do some *real engineering again?*

**Job:** **Director of Product & Program Management**

**Location:** Graz Austria

**Start Date:** Q2 2019

#### **Overview**

Panthronics AG an independent IC company with expertise in high performance NFC/RFID hardware and software solutions is anticipating the forthcoming launch of the PTX range of differentiated NFC products. We are currently looking for outstanding people in this domain to strengthen our teams in Graz and in APAC and North America. We require a trailblazing **Director of Product and Program Management** who will own the technical customer engagements and define the next generation of PTX products.

#### **Job Description**

- Technical lead for all key customer engagements, coordinate applications and communicate/present all technical programs.
- Ability to understand customer needs and clearly synthesise to engineering, management and marketing in order to execute the go to market plan, key customer programs and definition of the roadmap.
- Technical lead for all key eco system/value chain partnerships to bring differentiated solutions to market.
- Own all technical collateral, datasheets, application notes, demo board and reference design definition.
- Ownership of the technical design in process, clear and concise communication requiring excellent presentation skills.
- Working closely with and providing market intelligence to the product management and applications team.
- Representation of Panthronics at key events such as NFC Forum.

#### **Job Profile**

- A solid know how and proven track record of the IC design in process at Tier 1 and 2 mobile OEM's.

- You should already have an exceptional array of key contacts at mobile vendors and/or NFC ecosystem partners.
- Known as an expert in both the NFC and/or mobile/security domain. Thorough understanding of the NFC architecture from silicon to back end.
- Pioneering spirit, with a sense of urgency and willingness to think outside the box to get things done.
- An ability to maximise value on the market and at the customer.
- Ability, reputation and skills to be seen as a champion and endorser of the PTX brand
- Needs to be able to work as part of a team.
- Fluent English a must, second language (German, French, Mandarin) an advantage.

### Compensation

- Salary commensurate with market based on individual person  
*This position is in accordance with the Austrian collective agreement for employees within engineering companies, employment group V: [www.ingenieurbueros.at/verband/de/kollektivvertrag](http://www.ingenieurbueros.at/verband/de/kollektivvertrag).*
- Generous Stock Incentive program
- Variable incentive scheme
