

Want to do some *real engineering* again?

Job: Near Field Communication (NFC) Software Engineers
Location: Graz Austria
Start Date: Q2 2019

Overview

Panthronics AG an independent IC company with expertise in high performance NFC/RFID hardware and software solutions is anticipating the forthcoming launch of the PTX range of differentiated NFC products. We are currently looking for outstanding people in this domain to strengthen our teams in Graz and in APAC and North America. We now require additional experienced **Near Field Communication (NFC) Software Engineers** to define and develop software for RFID/NFC, Mobiles, Wearables, and IoT-Applications.

This is an exciting opportunity to join a first-class team and gain a meaningful equity position within a fast-growing company.

Tasks and responsibilities:

- Understand RFID/NFC architecture requirements in mobile and infrastructure devices
- Develop software, firmware and APIs in a multi-language environment (C, Java, Python)
- Design and implement test specifications and tools (instrumentation and robot control)
- Strong interaction with off-site design teams and closely work with the hardware team
- Cooperate on specifying features of next generation software stack

Profile:

- Degree in the field of electronic engineering, computers science or equivalent
- Familiar with RFID/NFC applications
- At least 2 years' experience in software/firmware engineering
- Good knowledge of state-of-the-art software development tools
- Self-reliant way of working with excellent debugging skills
- Fluent in English - German skills are a plus

Compensation

- Salary commensurate with market based on individual person
This position is in accordance with the Austrian collective agreement for employees within engineering companies, employment group V: www.ingenieurbueros.at/verband/de/kollektivvertrag.
- Generous Stock Incentive program
- Variable incentive Scheme
